

DOSSIER DE PRESSE – PRESS RELEASE

EXHIBITION “INSTANTS DE GRÂCE”

FROM APRIL 26 UNTIL MAY 9, 2018 AT THE LAVOIR VASSEROT
SAINT-TROPEZ, FRANCE

Grace, the magic moment of a non-definable charm that is perceived unexpectedly when looking at a human-being or a landscape.

Katharina JANUS, sculptor, and Xavier ROY, photographer, excel to make the untouchable visible, the “je ne sais quoi” that cuts through your heart and your sole. It is with sensibility and talent that the two artists expose you to this, one through clay and the other through images. Katharina JANUS, German artist, has pursued the summits of classical dance with great passion and today is a professor who spreads her knowledge around the globe. Her sculptures express “grace” in a delicate, ephemeral and fragile way; simultaneously, she underlines strength and power in her artwork inspired by athletic bodies that she refines forever in their most elegant postures.

Xavier ROY has captured exactly these movements, hardly sketched and already disappeared, with his lens over the course of his travels around the world. Magic moments experienced here or there, often in far-away countries, many elusive attitudes and gracious surprises through his attentive and curious eye provide insights into a life full of expressed sensibility in black and white...

“Instants de grâce” the encounter of two artists who – each in their own way, with their eye and their hands, but always with their heart know how to let time stand still...
